

# We work together. To get things done.

Manage project complexity with a suite of design and planning tools

## INTERACTIVE WALL

### Collaborate on a large scale

Complete your pull planning solution with an interactive wall that takes the traditional big wall experience into the digital world. Its huge surface offers precise 40-point multitouch and highly flexible configurations – letting you keep what you love about your paper processes while adding digital flexibility.

### Nialli™ Visual Planner

Choose the digital pull planning tool that's intuitive by design, for contractors and trades alike. Nialli Visual Planner is a digital application of the Last Planner System® that is familiar and easy to adopt.

### Nialli™ Design Planner

Apply the principles of lean and the Last Planner System in the preconstruction phase of a project. Nialli Design Planner helps teams visualize conversations while working together to design and plan a building project.

### Nialli™ Workspace

Ensure all relevant project information is available to teams while they plan together. Nialli Workspace lets teams share drawings, documents, images and more, whether they're in a Big Room or distributed around the globe.

### Full remote access

Give teams the flexibility to work exactly how they need, whether colocated, distributed or hybrid. The Nialli suite of design and planning programs works with all kinds of tech products – including large interactive walls and displays, laptops, tablets and smartphones. Connect and contribute from anywhere, on any device.
